"Displacing Delray" 2016 - 2017

Delray: Program Development and Delivery

A ten month photographic chronicle of one particular community in Detroit, an encyclopedia scaled documentation of the last year inhabitants will call home to Delray.

Over 6,000 images, audio recordings, notes, artifacts generated and collected.

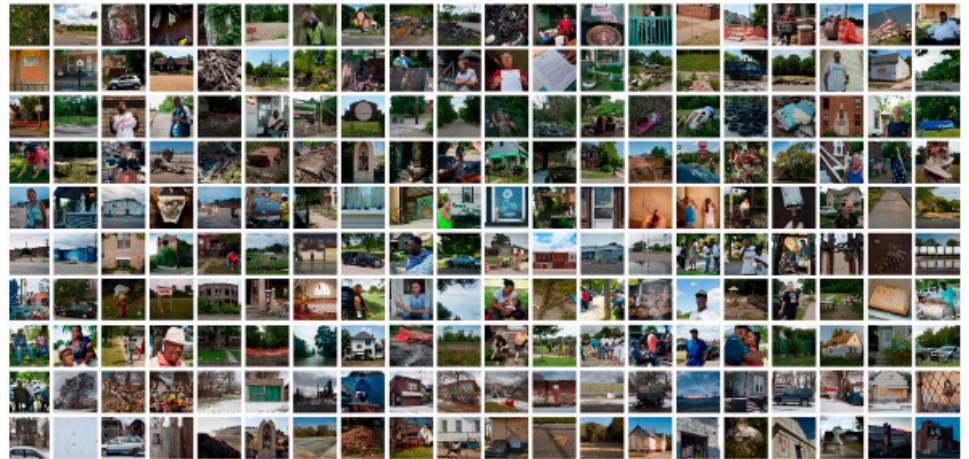

Current state of deliverables is the book "*Displacing Delray*".

Designed by Leah Wendsinski '17, part of a year long independent study.

Particular attention to recording exact GPS locations of every image, supported the graphic mapping components of the book. This unique system, developed by Wendsinski, was key to telling the geographic aspects of this story.

Self published, 512 pages, April 2017. First edition.

Communication Design Chair Susan LaPorte played a key role as Wendsinski's advisor.
